

At restaurant Thai - on Thai Diamond - we prepare our dishes in a traditional Thai way

A fine selection of delicious Thai dishes and some regional dishes from Isaan, in northeastern Thailand, are on the menu. Isaan is a poor and arid region where it only rains a few months a year. The food from this region is generally much spicier and distinct of taste.

We offer five stages of spiciness you can choose from. But you can also specify your personal preferences (eg no extra onions or mushrooms , etc.) to our employees. We use many (Dutch) seasonal vegetables to complement the dishes, serving you an original, affordable and healthy meal.

specialties of the cook:

sponsorship

Each year we sponsor another school in the home of Benjamat Samat (chief cook of the restaurant). The region is located in the northeast of Thailand, a poor agricultural area. The sponsorship we do together with our customers. We have a pot in our restaurant, where customers can put their donation. When we visit Thailand, we buy things for schools that they don't receive from the government. Such as: computers, sound equipment and other supplies. In this way we try to contribute something to the overall development of children in Thailand. The money we collect, we donate it with goods or foods, directly to schools. The schools won't receive any money in their hands, in order to exclude corruption. We appreciate your help, donations and support a lot!
